

Data availability summary

11 October 2021

This document contains plots summarizing availability of data concerning stateless persons from the UNHCR database and readily available census data from IPUMS. For each country where at least some data is available, a plot is displayed showing all years with observations organized by data source, and some details about each observation including whether age information is available, and whether the 2020 observation can be considered reliable. A purple bar indicates a year where there is overlap between a UNHCR count and a census containing a relevant field.

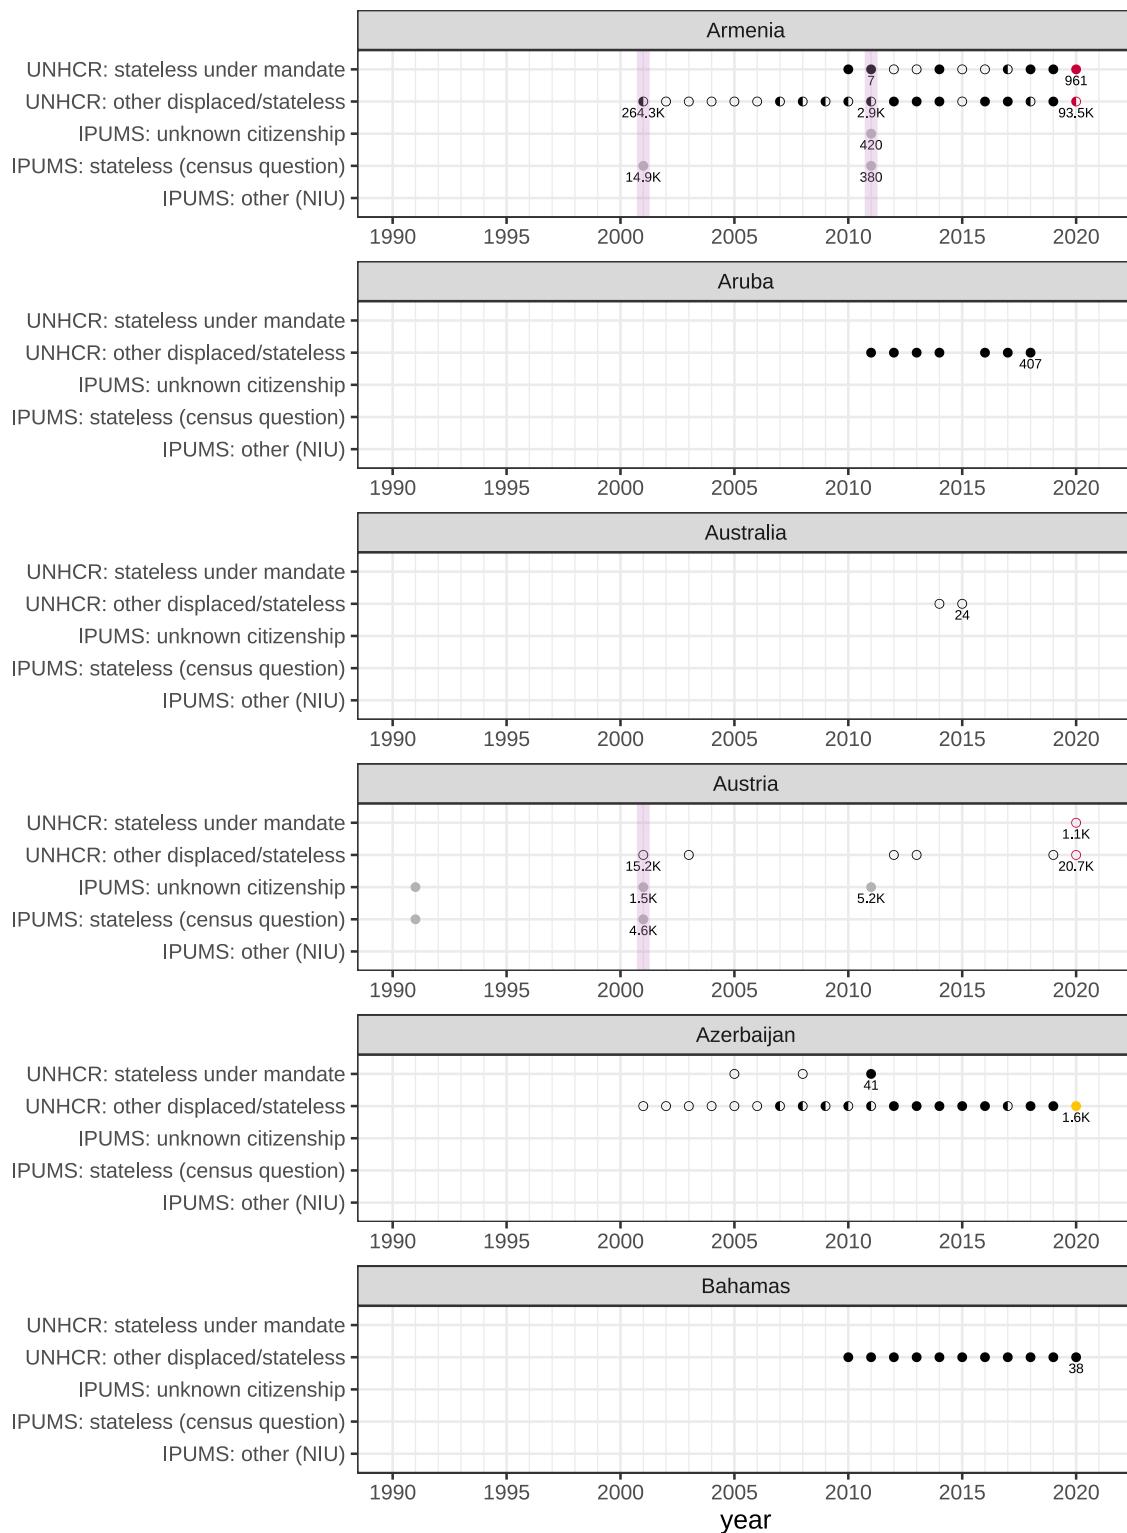

Appears reliable ● yes ○ maybe/partially ● no ● IPUMS sample ● NA

Prop. with age information ○ Less than half ● More than half ● All

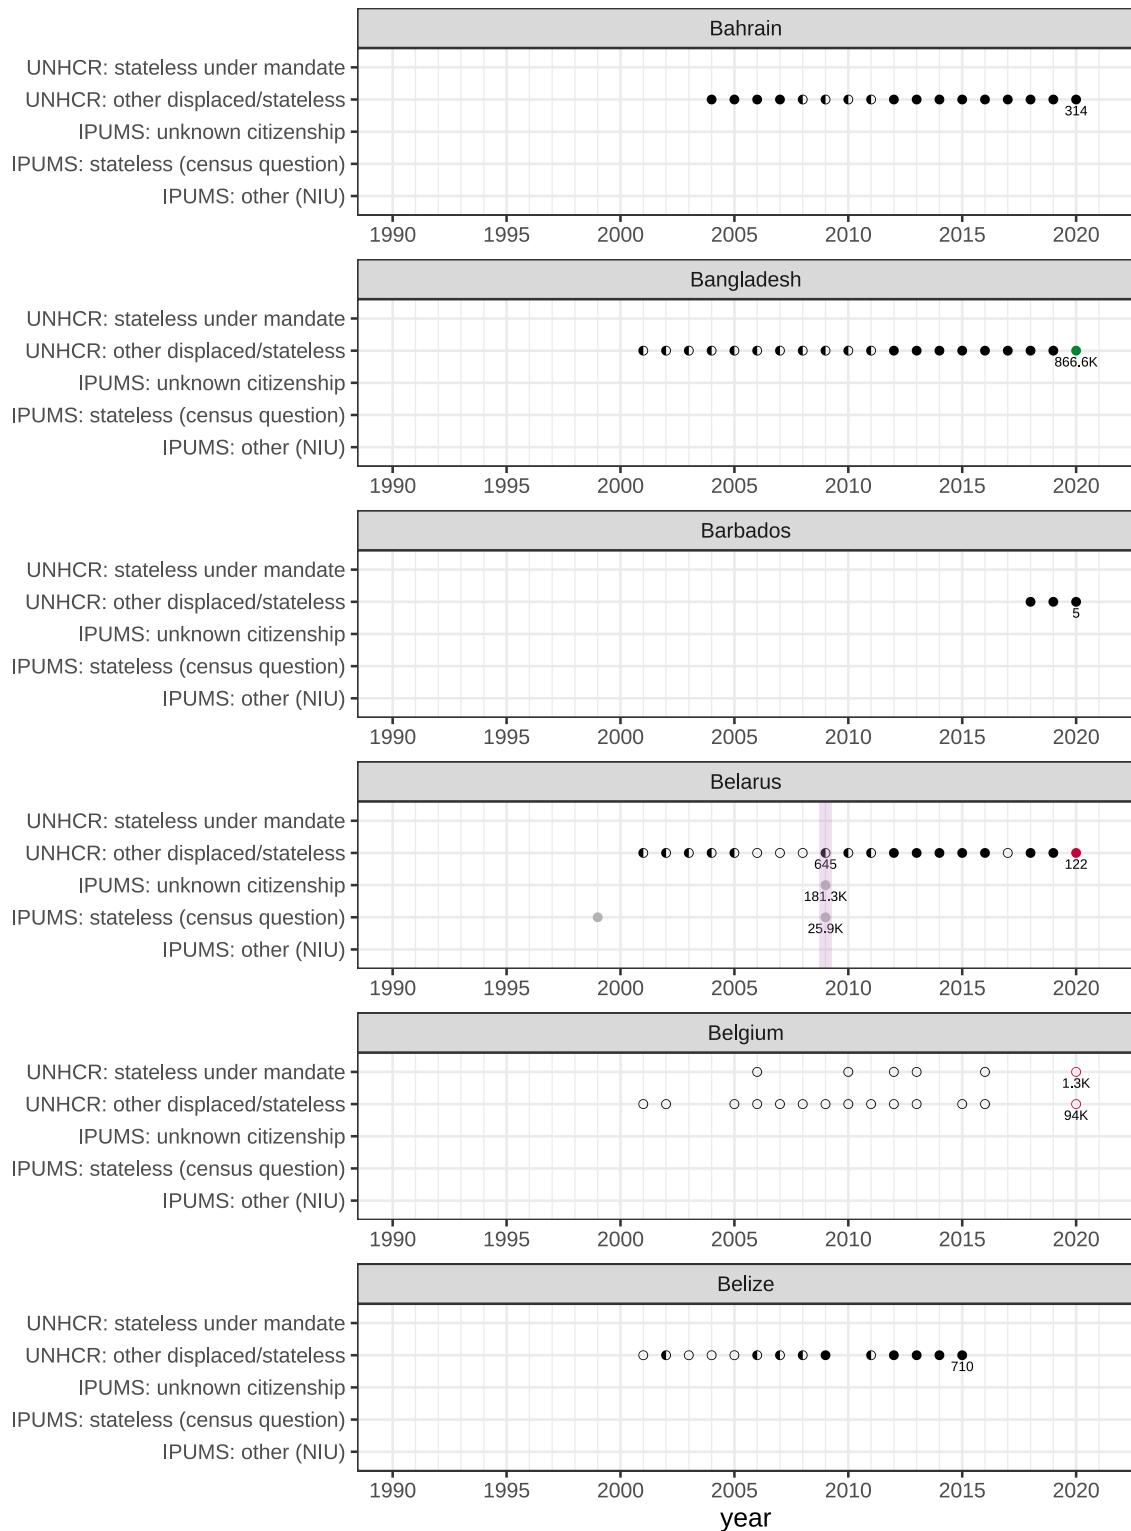

Appears reliable yes maybe/partially no IPUMS sample NA

Prop. with age information Less than half More than half All

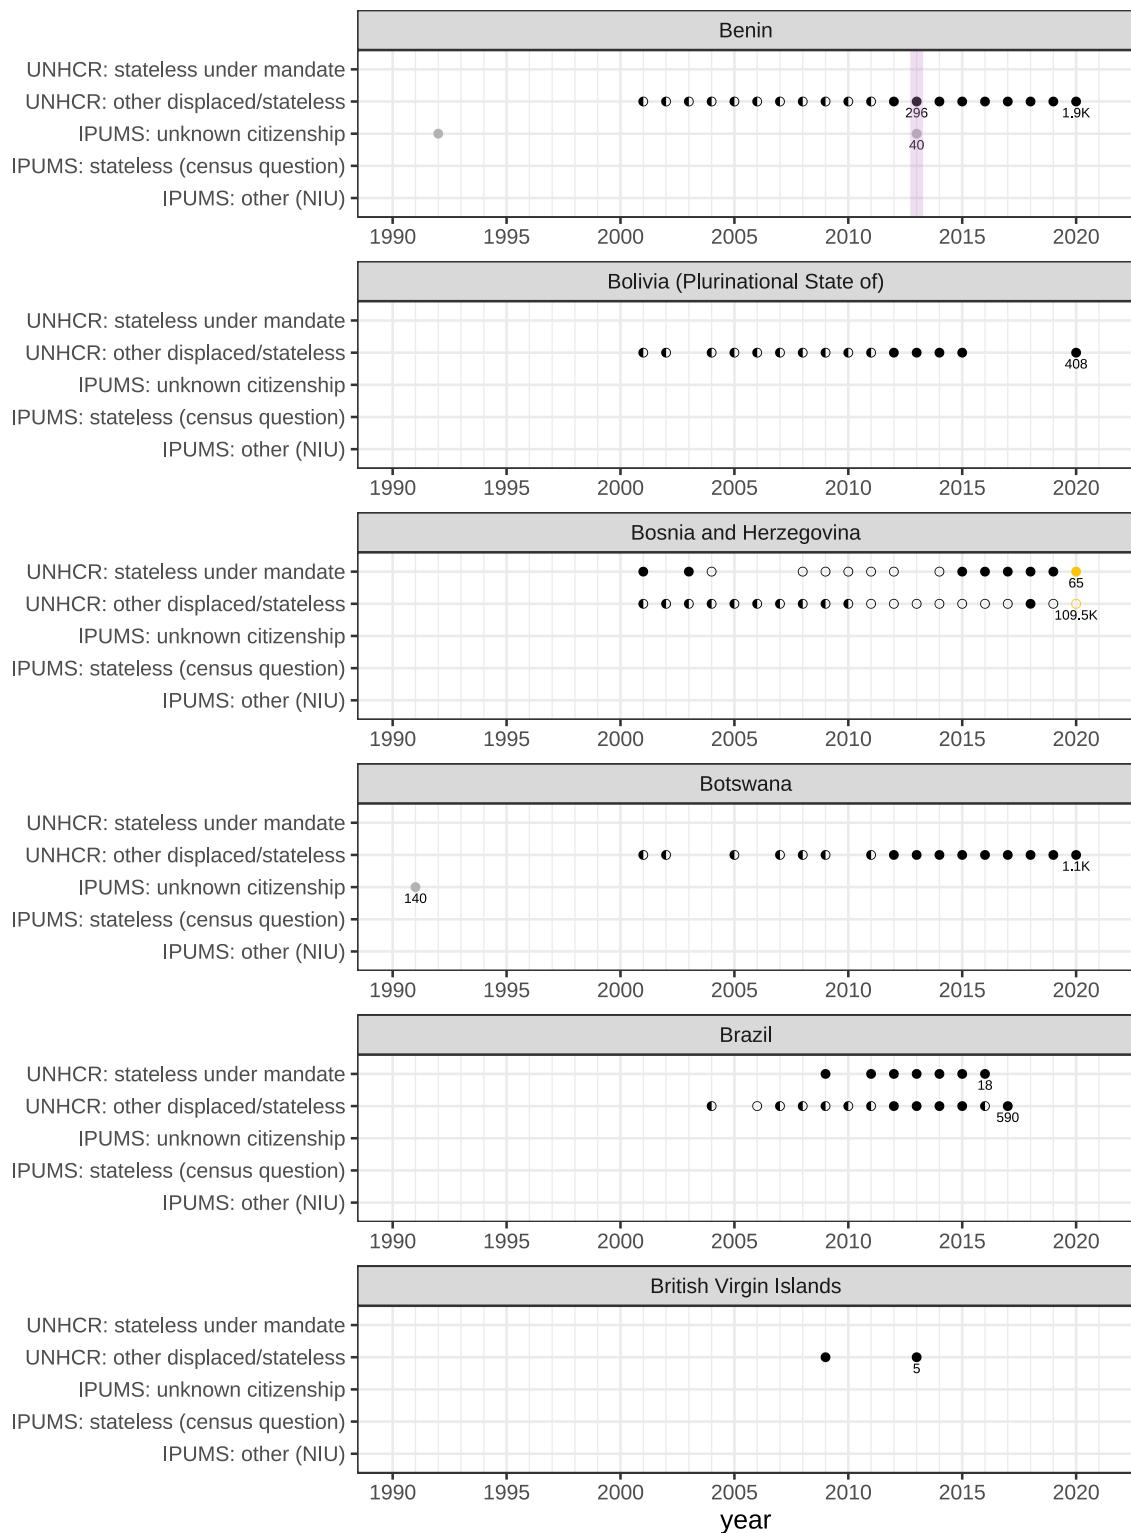

Appears reliable ● yes ○ maybe/partially ● no ● IPUMS sample ● NA

Prop. with age information ○ Less than half ● More than half ● All
